PROFILE

Passionate and creative 3rd-year Software Engineering student at NUST with hands-on experience in building web and mobile applications. I enjoy designing intuitive user interfaces and solving real-world problems through code. I thrive under pressure and am always eager to learn, grow, and contribute to innovative software projects that make an impact to the growth of the community and the business.

WORK EXPERIENCE

Go Drop Logistics 2023 - 2024

Client Relations & Dispatch Coordination

- Assisted with customer relations and coordinated communication with delivery drivers to ensure smooth and timely operations for Go Drop Logistics.

Access Electronics Aug 2024 - Nov 2024

Website Development

- I Assisted in front-end development for accessnamibia.com by contributing to the styling, UI design, themes, and color schemes of the platform. While not leading the entire project, I supported the visual and user interface aspects to ensure a consistent and appealing user experience.

PROJECTS

K12 School Web Application

Role: Front-End Developer

- Designed the full front-end UI
- Developed all pages, color schemes, and themes
- Provided the subject content

YoDiet - Meal Plan App

Role: Mobile App Developer

- Built the Home and Diet Plan pages
- Focused on layout and usability for goal and meal tracking

MAP Hockey App

Role: Front-End Developer

- Created Announcements and User Profile pages
- Designed features for coaches and players
